Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	User feels overwhelmed, searches for a support tool, finds the app, and opens it.	User starts a chat, types out their feelings, and reads the AI's empathetic responses.	User ends the chat, views their session summary, and logs out.
Touchpoint <i>What part of the service do they interact with?</i>	Web Browser, App Landing Page, Login Screen.	Chat Interface, Text Input Box, AI Chat Bubbles.	Dashboard, Session History / Mood Log.
Customer Thought <i>What is the customer thinking?</i>	"I need to talk to someone right now." / "Is my data private here?"	"Wow, it actually understands how I feel." /	"I feel much lighter now." / "I should use this again tomorrow."

		"This is very comforting."	
Customer Feeling <i>What is the customer feeling?</i>	Anxious, stressed, hesitant but hopeful.	Relieved, heard, validated, calming down.	Calm, grounded, supported, and reassured.

Process Ownership <i>Who is in the lead on this?</i>	UI / UX Design Team	Core AI Development Team	Data Management Team
Opportunities <i>How can we improve this stage?</i>	• Make sign-up faster (e.g., Guest Mode) so users in distress don't have to wait.	• Add quick-reply emotion buttons for users who are too exhausted to type out long sentences.	• Send a gentle, optional check-in notification to the user 24 hours later.
